-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

CLAIMS

Summary

Claims 1,21,24,29 and 30 are the independent claims under consideration in this Office Action.

Claims 2-20,22,23,25-28 and 31-35 are the dependent claims under consideration in this Office Action.

Claim Rejections - 35 U.S.C. § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 24,25 and 28-33 are rejected under 35 U.S.C. § 102(b) as being anticipated by Arbter et al. (5,129,171).

Arbter et al. teach an embroidery frame for use on an embroidery sewing machine when performing high-speed embroidery on the material (column 8, lines 35-36). Arbter et al. teach an inner frame and an outer frame and an expandable hose 8 (figure 2d, for example). The hose is expanded by fluid pressure and includes at least two portions at 12 and 19 (see figures 4a and 4b), which are materially different such that the inflation rates would also differ and the hose would change shape differently

during pressurization. The hose is inflatable for sandwiching the material between the hose and the outer frame while the material is being embroidered.

Claims 24,26,28-30,32 and 33 are rejected under 35 U.S.C. § 102(b) as being anticipated by Arbter (DE 37 33 886 C1).

Arbter teaches an embroidery frame for use on an embroidery sewing machine. Arbter teaches an inner frame and an outer frame and an expandable hose 12,13,14 (figures 3 or 6, for example). The hose is expanded by fluid pressure and includes a creased portion at 14 and at least two separate portions 12 and 13 which are independently inflatable by inflation means 51 and 54 (figure 6), which are different such that the inflation rates differ and the hose would change shape differently during pressurization. The hose is inflatable for sandwiching the material between the hose and the outer frame while the material is being embroidered.

Claims 24 and 29 are rejected under 35 U.S.C. § 102(b) as being anticipated by Berg et al. (508,211).

Berg et al. teach an embroidery frame for use on an embroidery sewing machine. Berg et al. teach an inner frame and an outer frame and an expandable hose 5,10 and 15 (figure 2, for example). The hose is expanded by fluid pressure and is inflatable for sandwiching the material between the hose and the outer frame while the material is being embroidered.

ALLOWABLE SUBJECT MATTER

Claims 1-23 are allowable over the prior art of record.

Claims 27, 34 and 35 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

PERTINENT CITATIONS

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Howden illustrates an embroidery hoop including a cord fitting into a recess in at least one hoop. Hoskings et al., Illemann et al., Wadstein and Murphy illustrate devices including inflatable hoses for tensioning materials between frame members.
